PROFILE

I build apps. I find writers. I like the work between an idea and the person it reaches. That has taken me from delivery apps and crop cameras to running an engineering publication, and now to building with AI agents.

SELECTED PRODUCT WORK

Glint / TradeShot · Independent product — In development

- Building a personalized trading-agent app to help people approach markets more thoughtfully: bringing evidence, risk and clear boundaries together instead of encouraging impulsive bets. See Glint.

Independent app developer · Apple platforms — 2024 - present

- Take apps from a human problem to a working product. Rifflet turns a music idea into a playable lesson; Orbits helps people plan trips and meetups. Explore selected work.

EXPERIENCE

Managing Editor · Better Programming — 2021 - 2023

- Worked with Medium on curation, distribution, product feedback and editorial tools; built a scouting workflow to find writers, reach out to hundreds, onboard them and help their work reach readers. Better Programming reached 4,600 authors and 151 million views over its lifetime. My farewell · Publication story
- Created Coffee Bytes to spotlight writers through interviews and roundups; one collection featured a 10-year-old writer and a septuagenarian learning Java.

Android Team Lead & iOS Developer · Agricx — Oct 2018 - Nov 2019

- Led Android work and coordinated with web and machine-learning teams; built the first iOS app using OpenCV and AVFoundation for crop imagery. Combined product decisions with hands-on implementation. Read the Agricx story

iOS & Android Developer · Aged Care Decisions — Jan 2020 - Feb 2021

- Shipped white-label apps for different teams, adapting skins, layouts and configurations around a shared app.

Lead Android Developer · MOBEY — Nov 2015 - Oct 2017

- Built customer and driver apps and helped redesign the iOS apps while working remotely. MOBEY on 7 News · Career story

Android Developer & Technical Writer · JournalDev — 2015 - 2019

- Wrote 300+ tutorials on Android, Java, Kotlin and Swift and built the first Android app. I also write about technology and satire: Humor Bytes · Big Tech.

SKILLS & EDUCATION

Product thinking · Developer experience · Editorial and community leadership · Swift, Python, Kotlin, Java, Android
B.E. Computer Science · BITS Pilani, Hyderabad · 2011 - 2015
Outside work: writing online, photography, films and cricket. I talk to agents, too.
