THE THREAD THROUGH IT ALL

I have built delivery apps and crop cameras. I have found writers and helped their work reach readers. Now I build apps with agents and help my landlord run his stays. Different work, same question: how do you make it useful for someone?

WHAT I'M MAKING NOW

Glint / TradeShot · Independent product — In development

- Building a trading companion for when the market feels like a casino. The idea: revisit trades on a chart, spot habits, and reward sticking to a plan. Good decisions deserve attention too. Selected work.

Independent app developer · Apple platforms — 2024 - present

- Build independent apps and take on freelance work: Rifflet turns a music idea into a lesson, Orbits helps people plan trips, and Pastport finds stories in Safari history, like when my iPhone left an Airbnb. For Meami Stays, I help my landlord with a personal booking platform, guest communication and marketing. More work.

ALMOST FULL-TIME JOBS

Managing Editor · Community building · Better Programming — 2021 - 2023

- Planned curation and community strategies to help programmers develop and share their best work on Medium. Found writers, reached out to hundreds and helped them onboard; worked with Medium on distribution, product feedback and editorial tools. Better Programming reached 4,600 authors and 151 million views over its lifetime. My farewell · Publication story
- Created Coffee Bytes to spotlight writers through interviews and roundups; one collection featured a 10-year-old writer and a septuagenarian learning Java.

Android Team Lead & iOS Developer · Agricx — Oct 2018 - Nov 2019

- Led Android work and coordinated with web and machine-learning teams; built the first iOS app using OpenCV and AVFoundation for crop imagery. Combined product decisions with hands-on implementation.

iOS & Android Developer · Aged Care Decisions — Jan 2020 - Feb 2021

- Shipped white-label apps for different teams, adapting skins, layouts and configurations around a shared app.

Lead Android Developer · MOBEY — Nov 2015 - Oct 2017

- Built customer and driver apps and helped redesign the iOS apps while working remotely. MOBEY on 7 News · Career story

Android Developer & Technical Writer · JournalDev — 2015 - 2019

- Wrote 300+ tutorials on Android, Java, Kotlin and Swift and built the first Android app. My writing: Medium collection · iOSDevie · Humor Bytes · Big Tech.

TOOLS, EDUCATION & LIFE OUTSIDE THE TABS

Product thinking · Developer experience · Editorial and community leadership · Swift, Python, Kotlin, Java, Android
B.E. Computer Science · BITS Pilani, Hyderabad · 2011 - 2015
Elsewhere: writing online, photography, films and cricket. I talk to agents, too.
